# Introducing the New Endura 7 1/2' Wide Aluminum Livestock Trailer

**7 1/2' Wide Model Lengths Available From 16' to 34' Long**

## **Rear Gate Safety System**

## **Safe Slam Center Gate(s) Double Wall Smooth Interior Beveled Fenders**

The New 7 1/2' wide Endura Aluminum Livestock Trailer fills the gap between the 7' and 8'2" widths that have been in production since the beginning of the Endura. This new width is a true 90" between the walls. Because of the stakeless, smooth double wall construction, you have more room, and an easier to clean livestock friendly interior. The inside tapered fender was designed to ensure safety for the livestock and to maximize floor space.
